Completing a Game at the Birmingham Country Club

Despite the chill breeze and drizzle of rain last Thursday, Mrs. Paul Horst, Mrs. J. W. Calvert, Mrs. W. J. Walstrom and Mrs. James Hurley, pictured above, left to right, were out with their golf clubs for a round on the rolling greens of the Birmingham Country Club. They

were caught by the photographer as they conceded putts at the final 18th hole and even then, as they made their way to the clubhouse, were talking of going out for another game after a brief rest. (A Joe Wheeler Photo).

We Recommend You Consider the Following

- Actual Builder of Receiver**
Many sets are either merely assembled by the "NAME COMPANY" or contract built by some-one else.
- Circuit Design**
AC/DC receivers cost less to build, but provide poorer voltage regulation, resulting in varying picture brilliance.
- Number of Controls**
Fewer controls are necessary when good design is provided.
- Simplicity of Operation**
Generally, an additional adjusting should be required when changing stations.
- Installation Requirements**
Inadequate installation results in poor reception on the best receivers. A proper installation greatly improves reception on a poorly designed receiver.
- Qualified Service Organization**
Special test equipment and qualified service personnel required.

WHAT'S THAT wonderful new Ford "feel" you hear everyone raving about? It's the result of many things.

It's the ground-hugging, level "feel" of Ford's new "Mid Ship" Ride. You sit cradled between wheels—not over them—in the new lower center section.

It's the smooth easy-stopping "feel" of Ford's new "Magic Action" Brakes. Only Ford in its field offers you 176 square inches of lining area. Only Ford brakes that are fully self-energizing to stop you 35% easier.

It's the "feel" of surging power in Ford's new 100 h.p. V-8 and 95 h.p. Six engines. Only Ford in its field offers you this choice of power . . . only Ford, a V-type engine (the type used in America's costliest cars) . . . only Ford, 8 cylinders . . . only Ford, 100 horsepower.

And behind that new Ford "feel" are many other Ford "firsts". New "Hydra-Gol" and "Para-Flex" Springs that smooth out the bumps. The new "Life-guard" Body and frame structure—50% more rigid. New "Sofa-Wider" Seats—more hip and shoulder room than any other car in its field. New "Finger-Tip" Control gives you the "feel" of easy steering.

And with the new "feel" comes new classic-smooth styling. The famed New York Fashion Academy judged Ford the "Fashion Car of the Year."

Come in for a ride and see why you should order your Ford now.

White sidewall tires available at extra cost.
