Jack Ball Heads Traffic Committee

Jack Ball was named temporary chairman of the Citizens Traffic Safety Committee at a meeting Tuesday night.

The committee met to discuss plans for the proposed traffic safety council for the city. Numerous suggestions were made for the formation of the committee and the various problems which face it.

Edward Rockwell of the Michigan Automobile Club said it was his belief that the committee should work in close cooperation with police and city officials. He stated that he felt this would assure them of backing actions which would be constructive and in the same time in full legal rights.

Both cited the three of traffic safety: Enforcement, engineering and education. He stated that he felt the first two were well covered in Birmingham, but that the third, education, was lacking. He said he would like to see the city take steps to improve its traffic education program.

The committee generally agreed that to handle the problem properly, it should be organized as a public utility. He stated that he felt the first two were well covered in Birmingham, but that the third, education, was lacking. He said he would like to see the city take steps to improve its traffic education program.

Moxley reported that V. W. Griffith chief has stated that he would like to see the city take steps to improve its traffic education program. He stated that he felt the first two were well covered in Birmingham, but that the third, education, was lacking. He said he would like to see the city take steps to improve its traffic education program.
