## 400,000 People Paid More for Their Cars than a Cadillac Costs!

You will probably find it difficult to believe the statement which appears above as the headline for this message. But records indicate that it is true, nevertheless. The reason for this is found in a surprising fact: There are eight other motor car manufacturers who produce certain models which actually cost more than the lowest-priced Cadillac.

Approximately four hundred thousand of these higher-priced models have been produced and sold in the post-war era. Undoubtedly, a great many of the people who bought these cars did so because Cadillacs were not available at the time they wanted delivery—a situation now happily being remedied. But it is doubtless true that many owners of these higher-priced cars don't realize what they did.

Cadillac has such a wonderful world-wide reputation for goodness and quality that many who can afford it mis-

takenly conclude it is beyond their means. So they pay the price of a Cadillac—and don't get a Cadillac.

We don't believe you would want that to happen to you. So we suggest that you come in and let us give you the actual delivered price here in this community for a Cadillac Sixty-one, equipped exactly as you want it. Let that be your economic yardstick as you select your car.

Bear in mind, too, that a Cadillac is an economical car to own, as well as a reasonable car to buy. Its freedom from need of repairs is sensational. It gives gasoline mileage which actually approaches that of the lowest-priced popular cars. And it lasts so long that its full life-span has never been measured.

Better come in today and get the whole Cadillac story. If you pay for a Cadillac, we think you will want to make sure that you get one.
