Look how you save with Dynaflo

FIRST thing you notice, of course, is the bother and effort Dynaflo Drive® saves. Next, that Dynaflo saves you physically—after long trips you're less tired and tense, more relaxed.

But then, as the miles pile up—and this comes from cold, recorded fact after Dynaflo's two years of public operation—you spot savings you hadn't expected...

You save on tires—because power application is steady. Even. On clutch expense—the usual friction clutch is gone.

On transmission maintenance, and the rear-axle expenses likely to go with it. And your engine, oil-cushioned against normal shocks and strains, needs less upkeep.

You may find another surprise, too. We are getting a steadily mounting number of well-satisfied letters about gasoline mileage with Dynaflo cars.

The SPECIAL shows some almost phenomenal records. The SUPER is delivering mileage comparing most favorably with gear-shift cars. And the ROADMASTER more than holds its own with cars of its size and bulk.

In short, there's much more to please budget.

ets in the 1950 Dynaflo than its new lower price. Refinements over the past two years bring sizable savings over the car's life.

Knowing that, don't you want us to reveal Dynaflo's big side—the utter smoothness of America's first oil-does-it-all drive?

Only Buick has Dynaflo—and with it goes: HIGHER-COMPRESSION Fueloh valve-in-head power in three engines (New F-263 engine in Super models) • **NEW-PATTERN STEERING**, with MULTI-GUARD feedback, top-through feedback, "double bubble" headlights • **WIDE-ANGLE VISIBILITY**, close-up road view both forward and back • **TRAFFIC-HANDY** size, least over-all length for easier parking and garaging, short turning radius • **EXTRA-WIDE SEATS** cradled between the axles • **SOFT BUICK RIDE**, from all-coil springing, safety-side rims, low-pressure tires, ride-steadying torque-tube • **WIDE ARRAY OF MODELS** with Body by Fisher.
