The Line Is Busy

BY DORIS E. KUS

The other Monday morning as I dragged my bruised and beaten bones into the news office to begin another week, someone I just seemed to know precisely what would be the subject matter for the column some week. That someone has been "reborn" and brought from oblivion, that I just found themselves in a most delicate and weary condition, is proof positive to other such socialites as myself that square dancing has finally got your truly.

Frankly, mine has always been a sort of wary approach to new matters and I have let this squaring feet go quite a long way forward before sending a heel and a toe in a quadrille or Virginia reel. But since over the past months, there haven't been any headline notices about such an energetic pastime to the effect the people have dropped dead from the strain, my mind was finally made up to try this tetrapodous field of endeavor at long last.

So on a Saturday night of we went, group of us, to try our talents—and endurance. I might add, the place was extremely crowded and in a way, that was a point in the evening's favor. Not all these people could completely ignore. Besides, everyone was grinning with much glee. But there must have been something the matter with the acoustics, because what the gentleman "calling" seemed to be saying was "ouch para's," "grea 'a'iff". And that was beyond me.

All this was discouraging at first, but after moments of desperate concentration (and a little peeking at the same time) phrases like "dusby dub", "ahmnnn liff" not to mention "essa y' para'n a' primad hurn" began to decipher themselves. Those already familiar with the idea of the dance were really helpful—showing us newcomers from one place to another and scrambling at us over the racket to "over the top" at the top of their lungs. It was unfortunate they didn't explain all this stuff beforehand.

Well, it's obvious that at the beginning it was a very thing but when the light "pinged" into our perspiring little brains, the fun began. That was each time "swing your partner" was called and the fellow would definitely obligate—causing a few bare of music lost before we gals touched ground again.

I liked the spirit of the whole thing—and the friendliness of all those present—and the handclapping and the chuckles and the stamping. There's nothing like it for, heck, the effect of the noise, healthy fun. It's good for losing a few pounds or so, too. Nothing like it really, though, to help the sorry muscles, not rubbing alcohol nor steaming hot bath. They tell me the only thing to do is to go right back for another squaring session. I'll go, they needn't drag me down as a tough fight man, but they won't.

Club news deadline is at noon each Monday.

NEW 1950 HUDSONS

AT SENSATIONAL LOWER PRICES*

*ON EVERY SUPER AND CUSTOM COMMODORE MODEL

With "The New Step-Down Ride"

Here are 1950's most beautiful automobiles • The only cars with "step-down" design, which provides America's lowest center of gravity and the steadiest road-bugging ride ever known • Along with more room than in any other car • Here's the added safety of Hudson's exclusive Monobloc body-and-frame** • The high-compression performance of America's most powerful Six • Or an even more powerful Eight • And all-range, Super-matic Drive! • Here, in short, are unique features that enable Hudson alone to bring you "The New Step-Down Ride"!

TODAY'S THE DAY!

The day to see the gorgeous Hudsons for 1950 that bring you a fresh motoring experience—"The New Step-Down Ride"—at sensational lower prices on every Super and Custom Commodore model.

This is the ride that cradles you in the lowest-built car of them all!

You instantly see that these New Hudsons have the lowest center of gravity in any American automobile—and as a result, you know instinctively, as you view them, that they hug the road more tensilely—and are therefore America's best-riding, safest cars!

You quickly see, too, that these low-built Hudsons for 1950 have full road clearance and more head room than in any mass-produced car built today—thanks to "step-down" design with its recessed floor!

And amazing head room is only one kind of spaciousness you'll find in these great cars! Through "step-down" design and ingenious use of space that is wasted in other makes, these new, streamlined Hudsons of normal exterior width bring you seat cushions that are up to 22 inches wider than those in cars of greater, outside dimensions.

In fact, when you try "The New Step-Down Ride", you'll find the New Hudson has more inside room than any other car, at any price!

You'll thrill to the get-up-and-go performance of your choice of two of the greatest engines in a long line of great Hudson engines—the high-compression Super-Six, America's most powerful Six, or the even more powerful high-compression Super-Eight!

But these are only a few of the great features of "The New Step-Down Ride" that mean more value at less cost. There are more, so many more that the only way to really appreciate all that the New Hudsons for 1950 have for you is to come in, try them yourself. May we expect you soon?
