Young Readers Can Find Good Comics

Now that it seems "comics" are here to stay, efforts are being made to sort the good from the bad and even materials presented in "comics" style for teaching.

Since most of us would find difficulty in sorting out good comics, Mrs. Lovell Backus, Michigan State college extension specialist, offers suggestions to help make wise selections for young readers.

She states that lettering should be large enough to be easily read with plenty of space between the lines. Paper should be white or light colored so that lettering and pictures stand out well for easy reading.

Drawings should be clear cut and not crowded on a page. They should be interesting—but not disturbing. Color pictures should represent truthfully the stories contained in the publication.

Select comics which contain correct and authentic facts, authority portrayed with respect, and relationships between people set forth as human and understanding.

Those who have made a systematic study of comics say that some have made noticeable improvements in their publications and many new ones have been added.

For example, amusing animal characters come to life in many of the stories, usually to the delight of young readers. There has been an increase in western stories and some of them are rated as very good.
