Economic Students Visit Bank

Members of the Baldwin high school economics class toured the Birmingham National bank recently in order to familiarize themselves with the business institute end of finance. Pictured above in the bookkeeping department of the bank are Mary Dodds, Dick Greig, Miss Beverly Cribb (instructor) Nancy Tracy, Joan Carey and Jim Buchanan. The students were shown the many steps of banking by members of the bank's staff, learning many sides of the finance picture which are little known by the general public.

While at Cranbrook, Dr. Cain has become botanist on the research staff at the Cranbrook Institute of Science, Bloomfield Hills.

WHILE AT CRANBROOK, Dr. Cain has become well known to Birmingham organizations for his talks on the inter-relationships between natural resources and population pressures. According to Dr. Cain his new work, which he will take up in the fall, is merely a transferring of his researches from the problems of plant and animal communities to those of people, being sociology of the broad type that has recently come to be known as human ecology.
