Most Beloved Car in the World!

Ask the average owner of a 1950 Cadillac whether he expects his next car to carry the same proud name—and the chances are he will find it difficult to believe that you are serious.

It simply never occurs to him that any other car could take the place of his beloved Cadillac.

And this deep respect for Cadillac goes far beyond its owners. In fact, it overflows the whole of America.

A survey just completed indicates that almost half of all the motor car owners in the United States would buy a Cadillac if they felt it suited to their economic situation.

Surely, in all our industrial history, there has been no finer example of quality's ability to hold the respect and regard of the American people.

We wish that all who want a Cadillac could own one. And we know that more would purchase Cadillacs if only they would properly evaluate these basic facts:

—the lower-priced cars in the Cadillac line cost less to buy than certain models of numerous other makes of cars.

—you can drive a Cadillac all day long, under normal conditions, on a single tankful of gasoline.

—a Cadillac car is built so well, its lifespan has never been fully measured, it is far more practical to own this car than most people realize.

Why not pay a visit soon—and see for yourself? We are sure you're closer to "The Standard of the World" than you ever thought you were!
