ADDING CHARM TO Your Home By Bill Wieland

THE CONVERSATION GROUP

Any "conversation group" of furniture requires the assistance of a coffee table. Usually this important piece of furniture stands like an orphan in front of a too-large divan. With so many exciting designs to choose from you'll be surprised at the difference a really interesting coffee table can make to your room.

Take for example, the one pictured above. In this intimate arrangement of sectional furniture the T-square shape is functional as well as charming to look at. It can be finished in almost any color... from stark white to jet black... all the in-between finishes. Just remember that it must be harmonious with your furniture and the wall finish. An object of furniture should stand apart or become immediately apparent in the room. Each piece should be part of the whole, and this is especially important with your coffee table. Its separate placement can easily lead to its being too prominent. So, when you choose its design, be sure to take the finish into account.

We have a good selection of coffee tables, and we'd be glad to talk over your grouping problems with you any time. Just drop in and we'll put our heads together.
