HERE is a man who's been doing a lot of thinking.

Someday, he's told himself, I'm going to turn in my old car and get a new one.

And he said, still talking to himself, when I do that I'm going to size up the fieldgive 'em all a real going over.

You see him here at the wheel of a Buick. He hasn't bought it-yet. It's a demonstrator, and he's trying it out.

But the more he tries it, the more he knows he's been wasting a lot of time.

From the moment he looked inside, he said: Here's the room-and the comfortand the style I've been looking for.

Then he nudged its Fireball Engine into

action. It's a high-compression valve-inhead, as you probably know.

He eased out into traffic. Stopped and started for a couple of traffic lights, and said something to the effect that this Dynaflow Drive* is a honey. Why don't they all build 'em this way?

He'saw a bump ahead. Place where the pavement had been torn up. Other cars were braking down to a creep to cross it. He held back-rolled right across at regular speed with barely a bobble?

It's hard to believe, he said, but what they say about Buick's ride is right.

Ten minutes later he was out on an open stretch of road, Tried an experimental push on the gas treadle.

Boy-what a take-off! You couldn't want more power than that.

Ten minutes more-and he knew something else. You don't really steer a Buick. It just about steers itself. Stays right on the beam on the straightaway. Even straightens itself out after a curve.

To make a long story short-he's found out that nothing else he's tried out can hold a candle-not even a little Christmas candle -to this bonnie beauty.

Back at the Buick showroom, he's going to get one more surprise. The price of a Buick is a lot less than he'd guessed it would be.

Moral: Smart Buy's Buick-right now,
