THESE folks are enjoying something that's being pioneered by Buick. It's freedom from the blinding glare of bright summer sunlight. It's freedom from hot laps—caused by the sun's rays beating down through the broad expanse of windshield. These freedoms trace to a new feature you may have noticed in '51 Buicks—a new kind of glass with a cool, soft, blue-green tint, in every glass area of the car, front, side and back. Buick engineers tell us that this "Buick first" reduces glare 18% over conventional glass—cuts sun heat as much as 45%—and Buick engineers are very conservative fellows.

This glare-and-heat-reducing Easy-eye glass is factory-installed at moderate extra charge. It gives you a built-in transparent "sun visor" right in the windshield—and it also dulls the dazzle of oncoming headlights at night. As we've said, this is something Buick owners were the first to enjoy. It takes its place with such exclusives as the valve-in-head Fireball Engine—coil springs on all four wheels—the firm power linkage of torque-tube drive—and the magic of Dynaflow. As we've also said—rather modestly—"Smart buy's Buick."

Come in soon and find out what an understatement that really is.
