

Politics is presumed to be the art and science of government, as mathematics is the science of numbers. When you incorrectly use mathematics, you get wrong results. When you allow selfishness, crookedness, double-talk, etc., to get into politics, you get just that.

## Theme of AAUW National Meet Discussed Here

"Freedom is our responsibility" was the theme of the AAUW national convention held late in April in Atlantic City. Mrs. Lawson Tabor reported on the proceedings before the general meeting of AAUW on May 9 at the Community House.

The speakers discussed the duties and responsibilities placed upon citizens by the need to enlarge and maintain freedom. The theme was then carried through to the particular meaning for members of AAUW, and was applied to American education in other debates.

The conclusion was, children should be educated at a very early age to new global attitudes, they should be encouraged to become world citizens and freedom must not be hindered.

Mrs. Kenneth Swartwood, new president of AAUW and Mrs. Hambley told about the education meetings they attended at the convention.

The meeting was then turned over to Mrs. Bease Boynton who gave a lecture on American Women of Wit and Humor, basing her talk on the writings of Agnes Repplier.
