Captain Frank Van Atta, captain of the county sheriff's department at last week's special township meeting: "I work seven days a week. However, my one recreation is football. There are usually six big football games a year in the state, and you can be assured when they take place, that I'll be taking those days off."

Highway Toll Again Moving To High Mark

Traffic accidents in Michigan during September cost the lives of 159 persons, two more than were killed in the same month last year. Injuries and accidents also were higher, resuming the upward trend which had been halted temporarily in August.

According to the State Police monthly statistical report, the traffic toll included 4,558 persons injured in 14,096 accidents. Injuries increased 225, or five per cent, over 4,333 in the same month a year ago and accidents increased 706, or five per cent, over 13,390.

Compared with the corresponding months of the previous year, traffic deaths have increased in all months of 1951 except April and May. Likewise, with the exception of August, injuries have been up each month since last February and accidents have been higher since May of 1950.

IF THE TREND continues the remainder of the year, the 1951 traffic toll will be the worst in Michigan history from the standpoint of total casualties.

The traffic record for the first nine months of this year shows 1,200 persons killed and 35,964 injured in 126,020 accidents. Deaths were up 77, or seven per cent, over 1,123 for the same period in 1950. Injuries increased 3,688, or 11 per cent, over 32,276 and accidents increased 15,715, or 14 per cent, over 110,305.

Travel in Michigan during August, the latest month for which figures are available, was 2.3 billion miles. This was five per cent over the 2.2 billion miles traveled in the same month last year.

Mileage for the first eight months of 1951 was up nine per cent, 16 billion miles as compared with 14.6 billion. The death rate per 100 million miles of travel, however, was down two per cent, 6.44 compared with 6.60.
