THE WEATHERMAN smiled Monday and gave workmen a nice day for the spire-raising project of the new First Methodist church on West Maple road. The raising of the 100-foot section has been delayed for some time because soft roads would not permit the passage of the heavy cranes needed for the work. The wood-frame, copper-sheathed spire was constructed on the site and has been ready for erection for several weeks, waiting only the right kind of weather and hard enough road surfaces.
