A FORMER resident and native of Birmingham who left here in 1939, Edmund H. Bunyan, was installed as Worshipful Master of Cedar Lodge No. 60, F & AM. t Clarkston Friday evening. Attending from here were John, P. MacKay and Leland Bunyan, members of Birmingham Lodge.

MOVING INTO ITS NEW OFFICES in Bloomfield Hills was practically an overnight shift for MacManus, John & Adams, Inc. It originally was believed it yould have to be done in stages perhaps over two weeks. But Birmingham resident Ken McQueen, in charge of MJ&S's production, had things so well organized the move was made swiftly. McQueen had every article of furniture tagged for its exact location in the new office. Employees were given a box into which they placed the contents of their desks. Then the movers loaded everything into trucks, merely looked at the identification tag, then placed everything down in its exact new location. When employees reported for work, their box was on top of their desk, already to be emptied into it:

WHENEVER A GROUP of newspapermen gather together, any entertainment they are provided must of necessity be very good. Such was Banjo King Eddie Peabody's performance at Dearborn Motors' press party last week. A good friend of Dearborn Motors President Tom Farrell, Peabody came to Detroit from Houston Texas, Shamrock Hotel, especially for the party. And when Peabody made his exit, the newsmen tried to get him back for an encore with a sustained burst of applause. When a group of newspapermen is so enthusiastic, it had to be good—and it was.

THIS WANDERER constantly is amazed at the utter dis-regard our Birmingham drivers have for the traffic signals along Hunter boulevard. Not once, but many times, we have seem these motorists stop at a red light, look north and south on Hunter, and then very unconcernedly drive across both lanes. So far all have been lucky... neither police officers nor other cars have happened along.

JERE F. DOROUGH, son of Mr. J. T. Dorough, 32262 Beaconsfield, Beverly Hills, has recently been elected vice-president of the Purdue University Student Union. Dorough was graduated from Lyons Township High school, LaGrange, Ill., in 1950, where he was a member of the glee club and the math club. At Purdue he was chairman of physical arrangements for the mock political convention, He is a member of Skull and Crescent, national sophomore activities honorary. Dorough is a junior in mechanical engineering at Purdue and a member of Delta Upsilon social fraternity.

WHAT WITH CONGRESSIONAL investigations, federal gambling licenses, etc., things must be pretty tough in the underworld, believes Birmingham dentist Archie McNaughton. The other night when he got into his car to drive home, he discovered he couldn't clear the moisture off the windshield. Some petty thief had stolen the wiper blades.

THE CONCRETE MASONRY residence of the T. L. Houles, 7448 Franklin court, in Franklin, is one of the homes pictured in a booklet just published by a national cement organization.

LEE A WHITE, public relations director for the Cranbrook Foundation, was one of the five-member team which Monday night initiated the first group of 18 students into the Wayne University chapter of Sigma Delta Chi, national journalism fraternity. White is a past national president of SDX.

"ENGINE CHARLIE" WILSON, in leaving his GM presidency to become Secretary of Defense under Eisenhower, thus becomes the first resident of Oakland county (and Bloomfield township, of course) ever to serve in a U.S. president's cabinet.

DO YOU KNOW that a Birmingham man has just come forth with a revolutionary type of bathtub, made of fibreglas and plastic materials? A tub of his, weighing only 17 pounds, it is stronger than one made of iron or steel, which weighs from 180 to 250 pounds. The man is Carl A. Strand, of N. Adams Rd., and he has spent nearly two years, and plenty of dough, in perfecting the tub. Already he has shown it nationally, and now operates two plants to produce it, one in Ashtabula, Ohio et the other at White Sulphur Springs. W. Va. Strand also developed a steel construction joist called Stran-Steel, which is used extensively in the building industry, and was a pioneer, in manufacturing and distributing an over-head garage door, in manufacturing and distributing an over-head garage door, in manufacturing and distributing an over-head garage door, him the control of the contro

A PICTURE AND STORY of the Birmingham Rotary club's recent Armistice Day presentation of its peace memorial to the city will appear in a forthcoming issue of The Rotarian, international guabilication of Rotary, Karl K. Krueger, the magazine's editor, has informed The Eccentric.

NEWS FROM HOME may be a bit late in arriving at the Artonic Monforte home in Lima, Peru, but in will undoubtedly be welcome. Mrs. Monforte, the former Frances Ritner of Franklin, has been issued a gift subscription to The Eccenthis from her parents, Mr. and Mrs. F. C. Ritner, for Christmas. Incidentally, another 'far-away subscriber is Dr. John Ormand, now serving in India as a medical missionary. As with all such Christmas gift subscriptions, The Eccentric sends along a nice card telling who is making the gift.

PEOPLE'S COLUMN

Ex-Board Member Says New Schools Not 'Luxurious'

To the Editor:

A letter appearing in the Peoples Column of Thursday,
December 11th, complaining about school taxes and roundly
condemning the Board of Education for its expansion program and type of schools recently erected, impels me to
challenge some of the statements expressed by this writer.

The view expressed could*

challenge some of the statements expressed by this writer. Wrongly influence the opinions of mevomers to our area, in whom I am particularly interested as my work is calling on these newconship of the statements which is more than a m

of ree, which our arcinects re-Birmingham was most fortunate in having in our locality, interested architects known nationally and the internationally as men of vision and planning so needed in a fast-grow-ing community. Bids were taken at a particularly asuppicious time, ef-arc readily available to prove the proofs, that the unusual design prowing less expensive to maintain than any of the other buildings.
