He said that the practical use of atomic energy in our lives was still in the future because of the danger from the radiation. This necessitates very thick furnace walls and a mechanism that will not need repair by human hands. Although atomic energy will not be used in our everyday life in the near future, radio active isotopes are being used to a great extent in medicine and metallurgy.

Symon's talk was followed by the showing of the film, "Dust or Destiny", which was made by the Moody Institute of Science of Chicago.

## Table Discussion On Walnut Lake Fire Dept. Transfer

Discussion has been tabled by the West Bloomfield township board until the Feb. 12 meeting on whether it will take over the Walnut Lake fire department.

Last fall the Walnut Lake fire commission requested the township to take over control of the volunteer department.

In other business at last Thursday's meeting, approval was given to construct offices in the upper floor of the township hall for the health department, police officer, building inspector and justice court.

**APPROVAL WAS MADE** to extending until March 1, the date when taxes can be paid without penalty.

Township Clerk Frank Hallett announced that the board will advertise for bids for a new fire truck.

At the next meeting, the board will discuss a proposal to hire an assistant assessor for the township. Supervisor Hiland Thatcher is the only assessor at present.

The clerk stated that the proposed new township building code has been sent back from the attorney with suggestions for a few revisions. The planning commission has been asked to check over the code and make the necessary changes.
