VOTE FOR DON LEONARD
 Michigan's Most Able Republican Candidate For Governor

Courageous Leader **Distinguished Administrator**
Brilliant Organizer **Experienced State Servant**

FROM A GRAND RAPIDS YOUNG REPUBLICAN:
 "I know both of the other leading candidates well. One has already been beaten in a previous race; the other at 70 is much too old name. To my mind, you are the best man to beat Williams."

FROM A JACKSON EXECUTIVE:
 "General Eisenhower calls his campaign a 'crusade'. Here in Michigan we've got our own crusade and we need a fighting leader. Of them all, you stand out as the man who is best qualified to 'turn the rascals out.'"

FROM A KALAMAZOO ATTORNEY:
 "Believing that your administrative experience, personal integrity and high ideals make you the best man for the job, I have switched my previous political preference and shall endorse you in the contest for Michigan's governorship."

FROM A DETROIT AUTO WORKER:
 "They say labor votes Democratic. Well, that's not so. There are plenty of us who want to see a good, honest, able Republican win and, for my money, you're the man."

FROM A FLINT MANUFACTURER:
 "Lots of small business men like myself are sick of professional politicians. We'd like to see an honest and experienced administrator such as you clean up that horrible mess in Lansing."

FROM A MERCHANT IN OMOSHO:
 "I can only afford a small contribution in money, but I'm making up for that by going to work its head off to make you our next governor."

FROM AN UPPER PENINSULA CIVIC LEADER:
 "The other night you swung our group completely over to you. None of the other candidates for governor has expressed so clearly and sincerely. You can count on getting just about all our votes."

FROM AN OAKLAND COUNTY FARMER:
 "Your record proves you are a deer and, Lord knows, that's what this state needs. If every officeholder subscribed to your creed, 'Nothing that is morally wrong can be politically right', our country would be a better place to live in. Our whole family is voting for you."

FROM A ST. JOSEPH CLERGYMAN:
 "practical politics that corruption and greed and try to fix hearts warming to know that I have a chance to cast my vote for a Christian gentleman of your caliber."

MICHIGAN OUTDOORS

BIG DECISION COMING
 On August 7th or 8th our Michigan Conservation Commission is going to have to make up its mind about the department's recommendations on shooting anti-deer season in some parts of the state during a special season. Right now they're weighing public opinion in the matter—as well as their own. And there's plenty of opinion available!

Trouble has been brewing for a long time with Michigan's deer herd—and the trouble has been winter starvation on a wide-spread basis. Winter before last we lost a carefully estimated 50,000 animals who couldn't find enough to eat in the overwooded yards where deer concentrate when the snows get too deep. That means a loss of 50,000 deer and all the meat that goes with them to hunters—but there's more to it than that. If those 50,000 deer had been legally killed in the fall there would have been far more feed for the rest of the herd through the hard winter months.

Herd In Poor Condition
 Proof that the health of Michigan deer is on the decline has been established by the fact that twin births of fawns, which is normally expected, is on the decrease. Worse than that, many does are not reproducing at all, and these conditions are most noticeable in the starvation areas.

As much as artificial feeding of the herd in the dead of winter is completely impractical there's only one realistic approach to the problem, and that's the one recommended by game biologists in our Conservation Department: A special open season for the taking of a limited number of antlerless deer in specific starvation areas.

Wisconsin Leads The Way
 Wisconsin, Michigan and Pennsylvania each have an estimated million deer, accounting for three million of the nation's seven million total. Wisconsin has faced the starvation problem, too, and is now making unprecedented progress in deer management. Their usual kill of bucks was around the 50,000 mark each year. In 1949 they killed their usual crop of bucks, plus 160,000 does and fawns. In 1950 they achieved their goal and sent 200,000 hunters home with a deer—buck or otherwise. Now the Wisconsin herd is showing signs of greatly improved health. The bucks are getting bigger and fatter and the does more prolific. Will Michigan follow this plan? Or will we continue to have a herd of puny animals unable to cope with the severity of normal Michigan winters? It's up to our Conservation Commission now, and their reaction to public opinion. What do YOU think?
