We like our business. Its pleasant

-Because it gives people pleasure

We write most kinds of in-surance. You might think this is pretty dull doin's.

But we figure what we sell is mainly . . . pleasure.

Insurance gives pleasure to insured people every day be-cause it banishes fear of loss and disaster.

But it gives greatest pleasure when it covers an actual loss. We've seen people who would have been ruined by a fire, lawsuit, robbery or other loss if they hadn't had insurance written by us. With insurance, they still found life pleasant.

DINING

At Its Distinctive Best!

You're off in a Swirl of Power!

We're willing to wager that not one person in a hundred knows what really goes on inside an automobile engine-so let's take this by easy stages.

The instant you nudge Buick's Fireball 8 Engine into action -a whole string of things starts to happen.

Eight sparks begin to crackle in well-timed sequence. Eight pistons start gliding up and down with rhythmic precision. Eight pairs of valves dance open and closed—to let fuel charges in, exhaust gases out of cylinder after cylinder.

All right, you say, what's so complex about that? Can't anyone build an engine that does this to perfection?

Well, we'd better add, these things happen at the rate of more than 10,000 times per mile -

and that's 100 times per second at 35 miles an hour!

So - it's important to know that Buick uses a deep-breathing valve-in-head design that shoots a fuel charge in - cleans exhaust gases out - in a hurry.

It's important to know that all the power instruction to know that an une power released by the fuel concentrates its driving force right on the head of each Buick piston. (Everyone who has recently built "new" high-compression engines copied this "Buick first.")

But most important of all - Buick adds one more twist which others still haven't copied.

Every charge of fuel rushing into a Buick engine becomes a twisting, swirling, high-compressed ball that flashes with sudden, consuming completeness the instant the spark sets

And to add this all up: clean, complete combustion-10,000 times per mile-is the secret of getting more power-more miles-from each gallon of gasoline.

So we're not simply using picture words when we tell you that Buick-and only Buick-has a FIREBALL ENGINE - or that you're off in a swirl of power with one of these high-powered performers under the hood.

1952 has brought a lot of sparkling new improvements which you'll want to see and admire when you come to our showrooms.

But the thrill of thrills is still what you and a But the thrill of thrills is still what you and a Buick—and a Fireball 8 Engine—can do out on the road. When do you want to try a sample?

Sure is true for '52
