Students Move To New Part of High School

By GERRY FLOREZ

With the opening of part of perhaps the most modern array of shops and laboratories for high school students in the country, Birmingham high school classes began to get settled in their new C building Tuesday.

The recently completed C building houses physics laboratories and classrooms. These include industrial arts, physics, mechanical drawing, printer shop, biology and chemistry laboratories, and auto mechanics departments. Biology and mechanical drawing students have moved into their rooms, with the other classes expected to follow suit in the near future.

The BIOLOGY classrooms have many eye-catching features. The students sit at two laboratory tables facing the front of the room, which features a built-in aquarium in the gray blood wall, and visible to every person in the class without moving; a showcase for displays, and the usual green chalk board spotlighted.

The mechanical drawing, chemistry, and physics rooms are laid out according to the usual pattern for such classes. However, the modern equipment and architecture, so characteristic of the new school, make them highly efficient and modern.

One of the finest setups in the school is awaiting the auto shop classes. The shop has the appearance of a regular repair garage, many power implements, a real hydraulic lift, and plenty of space in which to work.

Band To Compete In State Festival

By KIRK LEWIS

By unanimous decision of four judges the Birmingham high school band received a superior rating in the Southeastern Michigan band and orchestra festival at Ypsilanti Saturday.

This first division rating qualified the band for the state under the direction of Arnold W. Berndt, instructor of instrumental music, to compete in the state festival in East Lansing April 26.

The band played three prepared numbers, "His Honor" a march by Filmore; Bach's "Organ Fugue in G Minor"; and "Military Symphony in F" by Gossec. They then sight read the march "National Liberty" by Pittman and "Day of Youth," an overture by Fulton.

The judges of concert music were William D. Beville, University of Michigan; Keith Stein, and Leonard Falcone, Michigan State. The sightreading judge was Harry Begian, Detroit public schools.

Table Tennis Classes

Waiting completion of the high school is awaiting the auto shop classes. The shop has the appearance of a regular repair garage, many power implements, a real hydraulic lift, and plenty of space in which to work.

Classes have discussed the fundamentals and rules of ping pong. Although the playing schedule is irregular, they are planning to have tournaments. Four tables are furnished and ping pong equipment is brought by the participants.
