It May Be Starting a Million Miles!

Happy, happy man! His time has come to own the "car of cars" . . . and there he goes for the first thrilling ride at the wheel.

But what an additional thrill he would have if he could look down the long, long road that car will travel before it comes to its final stop!

For then he would know, beyond any doubt, that he has just taken possession of one of the mechanical masterpieces of all time!

Accurate records of Cadillac mileage are seldom kept throughout the car's whole span of life. For the average Cadillac has a succession of owners—and its accumulative mileage is thus difficult to compute.

But reliable statistics kept by a great tire manufacturer show that certain Cadillacs in its testing fleet have actually approached a million miles.

Naturally, when you take possession of a new Cadillac, you are not thinking of driving it for such a spectacular distance.

But consider, if you will, what this phenomenal endurance foretells for your own period of ownership.

It is your finest possible guarantee that the thrill and the satisfaction of your first mile at the wheel will go on and on and on—until, with reluctance, you pass the car along to another proud and happy owner.

And it means, of course, that the value of your Cadillac will endure. Even its second, and third, and fourth owners will find—as they pass the car along—that its relative value is amazing. There is almost always a demand for a Cadillac, regardless of its age.

Of course, the great thrill of owning a Cadillac comes from the car's marvelous performance and its wonderful prestige.

But it is so nice to reflect that your pride is practical—and that your satisfaction is coming from a sound investment.

Is it time for you to think about a Cadillac? If so, we would be happy to see you any time.
