## VERSATILE

High on a hilltop, surrounded by Blue Spruce trees, and overlooking orchard and stream, this immaculate Cape Cod offers more than it is possible to get today.

Built in 1941 for the present owner, a Chrysler engineer, under his supervision and specifications, such features as the Lifetime roof and American Radiator hot water heat are to be expected.

With two large bedrooms and bath plus the paneled den with its fireplace ON THE FIRST FLOOR, the small family is amply accommodated. For the larger family three more bedrooms can easily be finished upstairs.

Versatility is the key to this home. As the house can take care of two or ten as can the six plus acres. The orchard naturally divides itself into building sites as does the stream frontage, on a dead end black-topped road so if the acreage is too large you can sell off these pieces and end up with a beautiful home for many dollars less than it would cost to duplicate.
