I've never heard of a homemaker who only worked 8 hours a day...

and... I'm pretty sure you haven't either. Let's look at a homemaker's day. She starts with the family wash, irons the clothes, cleans the home, takes care of the children, plans the shopping, and cooks the meals. Oh brother, you get all that into an eight-hour day, and you're doing something!

What woman wouldn't welcome assistance with all those things? That's why Natural Gas, today's wonderfuel, plays a greater role in easier and better living than ever before. Modern homemakers use dependable, automatic Gas hot water heaters for washing and cleaning, automatic Gas dryers for drying clothes, and of course, automatic Gas ranges that provide freedom from cooking drudgery.

Take the modern Gas Range, for instance; stop and look at some of its wonderful new automatic features. You can bake, roast, and cook a whole meal in the oven automatically. The large, smokeless broiler meats fit for a king, modern top burners bring efficient cooking results every time, and there's plenty of storage space for your cooking utensils. If you are not already cooking with a modern Gas range, you're passing up one of the greatest labor-savers in the home today.

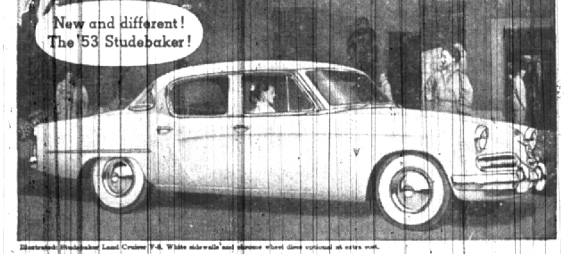

Your Gas Appliance Dealer...
 will be glad to show you these new automatic ranges. They cost less to buy, less to use, and less to install than any other automatic range on the market today.
