The PRIVATE LIFE of SENATOR Mc CARTHY

Starts in The AMERICAN WEEKLY with SUNDAY'S DETROIT TIMES

HOWARD COE of 1632 Webster has every reason to gaze proudly at the 6 1/2 pound small mouth bass which he caught a week ago while fishing at Wegwas Lake in the Upper Peninsula. Coe used a light fly rod in his battle with the big one which didn't get away, and had no net to assist in landing the fish. The lucky angler said he believed this was the largest small mouth ever taken from Wegwas and gives a great deal of credit to his bait, a live minnow. Coe was a guest Thursday evening on the Mort Neff "Michigan Outdoors" TV show. (Eccentric Staff Photo)

### New Stainless Steel Products Compete for Flatware Honors

Consider stainless steel for the table if you are considering the important purchase of flatware. Stainless steel has ideal qualities for long, hard use—it is tough, strong, non-tarnishing and acid resistant. The new designs and qualities of stainless steel flatware are greatly improved now. The better type is entirely suitable for enter-

nickel. This high-quality combination of metals may be marked "Stainless 18-8". Shaping is important. Inexpensive ware will be of even thickness while more comfortable and more costly types will be thicker at points of wear and thinner in some parts for ease of handling. Carefully smoothed edges indicate quality.

MANY COMPANIES in the United States are making stainless steel flatware now and imports are coming from Denmark, Germany, Sweden and Italy. Cost for a moderately expensive set for six persons will be less than \$10 while higher priced ware will be several dollars a place setting. Very inexpensive stainless steel is available for a few cents a piece.
