**QUEL**

Do you own a garbage truck? Or even a garbage can with a concomitant odor? Well, the above is not a French word, but the trade name of a new miraculous deodorant. Two or three drops in the can will remove all odor in a few minutes and last for several days.

**COLCHICUM**

A few of these mystery bulbs are available now. Merely lay the bulb on the piano or table (no water or soil) and they will soon flower. Of course there is really no mystery about them, they are so anxious to grow that they can't wait to get going.

**DRI-AIR**

Dripping, humid, musty basements are a bane to human existence. The Dow Chemical Company has provided the solution by making Calcium Chloride (Ca Cl<sub>2</sub>) a thirsty chemical which when suspended in proper holders (which we sell) "drinks" the water (H<sub>2</sub>O) out of the air. The resulting liquid kills driveway weeds or roots in sewers. Nothing is wasted—100% useful.

**CENTAUREA, GYMNOCARPA**

Otherwise known as Dusty Miller. You are wrong if you think "Dusty" is a rodeo rider or hot-rod driver. IT is a flower seed, and only one among many perennial and hardy annual seeds on hand for fall planting. Any seeds you may want which are not in our racks can be ordered for you.

**BLACK MEDIC**

Another name for spotted spurge. This is the ideal time to get after the crab-grass and weeds of many kinds. After they are eliminated it will be just about the right time for the fall fertilizing and reseeding.
