## Where Silence Is Eloquent!

Have you ever heard a 1953 Cadillac?

The roads are quiet, you haven't—unless you've listened quite carefully.

For it is a literal fact that you must concentrate to detect the sound of a Cadillac in motion... save, of course, for the soft hum of the passing wind and the quiet hum of the tires on the pavement.

Even that great, powerful engine never raises its voice above a whisper.

But, oh, the wonderful, wonderful story this marvelous quiet tells.

It tells, for instance, of Cadillac's rigid adherence to the highest standards and

ident of automotive construction... of the superlative engineering that enables every part of the car to perform in perfect harmony.

...of the magnificent styling and design that give the car its smooth, easy, steady, floating ride.

...and of the flawless craftsmanship that keeps the car so unbelievably free from vibration.

And, of course, it speaks with equal clarity of the many things a Cadillac provides its owner.

It promises rest and relaxation... and freedom from distraction that adds

pleasure and safety to every journey.

It foretells mile after mile of extraordinary dependability and a minimum of upkeep expense.

And it prophesies longevity... and, hence, bespeaks the wisdom and soundness of its owner's investment.

Yes, the quiet of the Cadillac car tells a wonderful story all of its own. And it's one that we think you should "hear" for yourself.

Why not come to noon—and spend an hour with a 1953 Cadillac?

We think you'll agree that silence was never more eloquent.
