## Adequate Water Supply

If elected to be your CITY COMMISSIONER I would consider ADEQUATE WATER SUPPLY to be one 'of the most' important problems facing our community . . .

Birmingham for more than 25 years has depended upon deep wells, beneath Birmingham's surface, for its water supply. Due to our tremendous population growth in recent years, there are times in the summer when water usage creates a serious demand on our pumping capacity, necessitating a rationing of water for residential usage. With continual growth of the city, this problem will become more serious and must be met NOW.

### This Is My Pledge

If elected to your City Commission, I pledge that I shall "burn the midnight oil" working with the other members of our Commission to investigate every practical means of increasing our water supply . . . always mindful that it should be done with the minimum of expense to our people.

Yours for a Better Birmingham,
