Fire Dept. Action Lauded by Reader

To The Editor:
For some time I have been reading about implied criticism of the Birmlingham fire department regarding their arrival in cases of emergency. This is to advise you of their prompt, efficient action in answering an emergency call to our residence on Wednesday, Au-

answering an emergency call to our residence on Wednesday, Au-gust 11. Our son, 16 months old, was stricken with a severe choking spell. I immediately called the fire squad arrived on the scene minutes after the call, and even before we could locate the family doctor. Im-mediately upon arrival, they took over and restored breath to the child.

over and restored breath to the child.

Needless to say, their prompt response to our emergency call was response to our emergency call was response to our emergency call was resident to the control of the control of

Alteration Changes Okayed, Bloomfield

Alteration changes in building ntracts on Bloomfield Village chool at a cost penalty of \$7.55. Ferrer approved by the Birmingham and of education August 17 n the recommendation of School upt. Dwight B. Ireland. The changes include the relocation of a partition and changing the exit sign and switch.

City To Share Cost

Reconsideration of an assess ment for a water main agains properly on the east of Southfield between Lincoln and Southlaws was approved by the city commis was approved by the city commis assessment? was spread 100 per cent against the property at the suggestion of city assessor Elmer V. Haack, the new assessment was a city-tilage expense.

GRASS

GRASS: Any of various plants that and pastures, and are eaten by horses, cows and sheep

This definition should be very encouraging to those of us who find in our lawns such delicactes as Black Medic, Pennywort, Mousear. Chickweed, Gilcover-the-Ground, Nosebleed Weed, etc.

In 1930 the Dept, of Agriculture wrote this about certain lawn pests: "One must learn to live with, rather than entertain hope of its exterminalism."

And we thought COEXISTENCE was a fairly NEW oncept of life.

Well, let's quit fooling and get down to brass tacks.

You should be well underway with your fall program when you read this. If not you should:

Spray weeds with 2-4D

Kill craberass with POTASSHIM CVANITE

Fertilize with GRO-SOD or TRIPLE X

Rake out dead weeds

Scratch up thin sparse areas

Sow good LAWN SEED

Rake seed in lightly

Roll with EMPTY ROLLER

Cover with THIN layer of PEATMORS

Now, if you are starting a new lawn, try and get the seed on early in September.

The ground should be brought to finished grade im-

Spray broad-leaved weeds with 2-4D. If crabgrass is present, spray it with POTASSIUM CYANITE.

Fertilize, seed, rake, roll and wafer—water: A good lawn seed is one with a balanced mixture of quick-growing temporary (nurse) grass such as RED TOP or PERNIAL RE and permanent grass such as KENTUCKY BLUE or FESCUE. (When using MERION BLUE GRASS it is better NOT to add competitive grasses such as Kentucky Blue or Fescue. On new lawns it is okay to add some RED TOP because it can germinate in a week and is very easy for the Merion to crowd it out.)

A good fertilizer is the type we sell—we mean—it is a 10-6-4 with part of the "10" (Nitrogen) in organic form.

No charge for consulting with us at the store.

Do you realize that in two or three weeks that LAMBERT SWEEPER which we now call a piece of JETSAM will be removed from the sale and the price upped to normal. (It ain't a broken piece of junk.)
