VALENTINE'S
is not a matter of science
BUT
is a matter of the heart

Its qualities can neither be measured nor analyzed. The heart tells us to what degree love and affection exist. If, a lady holds a particular spot in your heart, there is no better way to express this sentiment than to present her with a diamond or diamonds. But, here science does enter, for the perfection of the diamonds is a result of the most exact measurement and cutting. Nature's most precious gem, brought to perfection by man's skill in science, to express a sentiment of everlasting love.
