The Carat Weights Balance . . . BUT!

A \$450 Diamond Can Never Be The Equal Of A \$1,000 Diamond When Purchased From A Reliable Dealer.

1 Carat Diamond \$450.00

1 Carat Diamond \$1,000.00

Know The 4 C's Of Diamond Value

Know that every diamond has 4 characteristics that determine its value—Carat weight, Color, Clarity and Cut. A \$100 diamond can have as perfect a combination of these as a \$1,000 diamond. The difference will be size. The individual investing in a diamond should ask himself whether it's size alone or the best combination of the 4 C's he wants in his diamond. A reliable dealer will give the latter.

Claims to that effect can be made. But, given equal carat weights and different prices the lower priced diamond automatically has less of the desired qualities that characterize the other diamond. Obviously, this does not apply only to the prices used as examples above.

Know your dealer. In him must be placed your trust for value received. The reliable dealer is one who has pride in his profession, whose integrity is a matter of public knowledge. Aside from his integrity, he will never give less than fullest value because his living depends on your future purchases. If he appraises your "bargain" diamond as value less than paid for, it is not sour grapes, but the judgment of one who knows diamonds.
