England Does Have Very Nice Weather, Recent Guest Says

By FRAN MAIER

Contrary to popular opinion it does not rain all the time in England. Mrs. Joseph Hadjisky, just returned after 10 weeks there said there were only three rainy days.

"I bought an umbrella," she said, "and did not take it out at all. The weather was perfectly marvelous."

Mrs. Hadjisky was accompanied by her daughter Joan (Mrs. William Boniface) who plans to return with her husband, Dr. Boniface, when he goes to finish his work as a neurologist. Dr. Boniface is currently a resident in a St. Louis hospital.

WHILE ABROAD the two also included a trip to Norway, planning their trips around special historical sites and gardens in both countries. They included guided tours

as well as trips to many out-of-the-way places not often seen by the tourist.

"About the most interesting spot was the catacombs at Highgate," Mrs. Hadjisky reported. "It's really odd that so few persons seem to know about them and visit them."

"I have a picture of myself taken there, but fear I may never see it again. Somehow one piece of luggage, the one holding my gifts and souvenirs, strayed from the rest. For all I know it may even have been sent back to Norway, since address stickers to that country were on it. I am still hoping that it will complete its solo journey successfully and that some day we may meet again."

Greets Grandson

Young John Carter Roberts, born Aug. 2, at Cambridge, Mass., made it a real family affair.

Mrs. J. C. Roberts of Birmingham went to Cambridge to visit the prospective parents, Mr. and Mrs. Richard Roberts and be on hand to greet the new arrival. To add to the family theme, the lad was born on the birthdate of his maternal grandfather, Eaton Taylor of San Francisco.

Mrs. Roberts will remain in the east most of the month. The younger Roberts and two sons will be moving soon to Groton, Conn., where Richard, a MIT graduate in naval architecture, will become affiliated with the electric boat division of General Dynamics Corp., builders of the Nautilus and Sea Wolf, atomic submarines.
