Mexican chili sauce, perhaps not authentic in an Italian dish, is nonetheless a delicious flavor addition, (Clare says.)  
 A specialty she's heard of served in Atlanta, Ga., is a fruit pizza. She intends experimenting

with the pizza, made from uncooked fruit.  
 "It's hard to do for crowds," she says of serving pizza, but for up to six people it can be served, anytime.

Variety that is placed on pizza can include seafood. Shrimp sliced into three flat pieces each and arranged on it, with shrimp creole sauce with a little of its rice remaining in it, makes a different tasting concoction.

# An important point about stock car racing that may not have occurred to you: THE SAFER CAR WINS... AND CHEVROLET IS THE BIG WINNER!

Auto races aren't won by brute horsepower. Roadability, acceleration, precision steering and stamina—the very qualities that make a car safer for you—are the keys to victory on the track! And that's why Chevrolet is top car, by far, on the rugged NASCAR (National Association for Stock Car Auto Racing) Short Track circuit.

**Faster acceleration means safer passing**  
 Chevrolet's cannonball acceleration has punched past many a bigger car to victory! But the same blazing surge is a vital safety factor on the highway—one that can whisk you more safely around other cars and out of critical situations.

**Easier, super accurate steering**  
 Nimble is the word for Chevrolet. But you don't have to see them in action on a tight quarter-mile track to judge how they make other cars seem clumsy. You can feel that yourself in the press of traffic, and sense the feather-light precision of Ball-Race steering in every curve. Special ball bearings in the steering system roll with the turn of the wheel to reduce friction and to give you easier, surer control. There's extra safety, too, in Glide-Ride front suspension that keeps up the harshest bumps—that lets your car "keep

its feet under it" for maximum traction on the roughest roads.

**More stability on curves**  
 Chevrolet's famous stability means money in the bank to the race driver—it lets him broadside through turns faster and smoother. But it means peace of mind to you on the road—more comfort in every curve and less body-roll with broad-based Outrigger rear springs, extra security if you have to swerve sharply to meet an emergency, a solid "one-piece" feel that is a delight to any driver.

**The ability to slow down and stop quickly and smoothly**  
 Those big 11-inch brakes have averted many a disaster in the close-packed battle of racing. But they weren't designed for that; they were made to give you "heads-up" stops and extra stopping power in traffic, on mountain grades, on high-speed expressways.

Come in and try out this new winner yourself... and see how easy we're making it to buy a Chevrolet right now!
