**New Industrial Product Announced**

The Cargill Detroit corp., 2254 Cole Avenue, Birmingham, announces a new product for industry.  
 Increased accuracy in stock removal operations is now being achieved with the Cargill continuous proportional automatic size control.  
 In a rough grinding operation with an average stock removal of 0.016, part size is held within the finishable machine scatter, plus or minus .002. Tests have proven the control superior to an operator. This control method eliminates the saw tooth pattern graphically revealed in excess with the use of logging controls.  
 The Cargill size control develops

Birmingham since Robert Girardin took over its direction. My 13-year-old son, who didn't make the Little League earlier, now gets to play baseball in the new recreation department sponsored league over at the

high school, where they make an effort to let every boy get into a game. And my younger children are enjoying the playground program at the school, which they say is much better than in previous years."
