Ike Far Ahead of GOP In Popular Appeal

The vast majority of American citizens has responded to the age-old political bait of trading civic and economic freedom for what they think is financial security. Roosevelt's New Deal and Truman's Fair Deal really put this ancient bait on contemporary hooks, and for 20 years the Democratic Party (so-called) was kept in office.

Recause of the Korean war, because of Because of the Korean war, because of the increasing number of scandals in Tru-man's administration, and perhaps be-cause many folks just wanted a new her-to worship, a famous and beloved Ameri-can general was elected to the White House.

It is Eisenhower, then, and not exactly the Republican Party, that won a majori-ty of the people's votes in 1952.

Since his election, Ike has gone a long way toward embracing the social and economic philosophies of the New and Fair Deals.

His present standing proves him to remain the popular hero, not only of his own Party, but also of millions of inde-

Creative Force Thrives Only In Freedom

We give too much credit to politicians and statesmen. They are, in truth, the pygmies who ride on the shoulders of the giant of science, technology and invention. It is the sloganeers and politicians who have led mankind into its most terrible disasters—war and inflation.

gussaters—war and initation.

It is the dynamic upsurge of millions of men and women working in an atmosphere of freedom that is the great creative force behind all material progress. The incentives to own property are the spark plugs of prosperity.

Adherents to the philosophy of state paternalism are found largely within the Democratic ranks.

Today's old-line Republican leaders, while publicly acclaiming Ike's record and program, privately are "sick at heart". This I know, not only from observation, as a citizen, but also as a reporter who has discussed this subject with some present Republican political leaders. To win a popular election you either must be a hero in your own right, or a member of a political group long known for its 'ability to provide you with what you believe to be "something for little or nothing of personal effort."

For it should never be forgotten that most of the human family responds to that universal law which reads: "People seek the most they can get, with the least amount of effort."

ceaseless drudgery really began. There can be no welfare without wealth. There must be something to tax before the policians and their camp followers can redistribute the wealth and pin the "great humanitarian" badge on their bosoms. If some tragedy forced us to go back to the crude wooden tools and the man, horse, ox, wind and water power that prevailed when Franklin caught the lightning from the sky, we would at once return to the seventy-hour week, the dollar-a-day pay, and lives of endless toil. Nothing that politicians, statesmen, demagogues, labor politicians, statesmen, demagogues, labor unions or social reformers could do would prevent it!., If man is to become the beneficiary of

freedom from drudgery, then he must accept and apply technological progress.

There are about 26 Governmental agencies engaged in some kind of medical care, with five separate hospital systems—and 40% empty bureaucratic beds.

Some 104 bureaucratic agencies are engaged in lending, or guaranteeing loans, or insuring people with liabilities, amounting to some \$240,000,000,001 And this is outside the public debt of about \$278,000,000,000, and Social Security.

If today's clock could be turned back to those times when the horse & buggy was on the way to losing out to the automo-

bile, certain labor leaders would oppose bile, certain labor leaders would oppose the change. Unable to prevent it, they would then argue for governmental un-employment compensation and employer guaranteed wages to give them security while the great change was being made. This, to be sure, is a tremendous change in the traditional philosophy of individual self-reliance and personal freedom from dependence upon government for security.

At his "farewell dinner" July 29, the 149 city employees and close friends present were treated to a historical account of Don's municipal activities here, put in verse form by Barbara Matus, whose mother, Grace Hughes, is municipal build-

DON EGBERT WAS BORN in Nebraska

DON EGBERT WAS BORN in Nebraska some 53 years ago
In a wee little town of Neligh mid a storm of sleet and snow.
As a boy he was full off ambition and big ideas as well
So he struck out Western plain-ward and surveyed for quite a spell.
From there he went to Florida and engineered and consulted and such
But in '29 came the depression and it didn't leave him with much.
Meanwhile back in Michigan Birmingham was making its name
These two were destined to team up and go forward together to fame.
Our man started out rather lowly as his first worn hat will tell
He inspected the City's new buildings

and did the job so well
That soon he advanced and then onward
up the ladder of government he went
Before he quite knew what was happening—into the manager's slot he was

sent. His appointment took place in December of 1936 And for seven long years he worked steadily . . the City's trials and troubles to fix.

WHEN IN '43—the world was arumble—he answered his country's call
And sailed around the Pacific in ships both big and small.

He was discharged a lieutenant commander and then without further ado He came back to city management and moth-balled his Navy blue.

Here we are now in the present and find Don is with us still But he's about to journey onward though it's much against our will.

Now for some things we'll remember as

the years go flying by — Because they are a-la-Egbert and we think he's one swell guy: At Christmas those clever corsages that

At Christmas those ciever corsages that all the girls did wear And the red-skins he regularly pur-chased to add pounds to damsels fair. It would stroll to the Treasurer's Office just to hear the raves and rants As he would calmly ask for his pay-check—two days in advance,

some things Don had to say. Have you ever been told by Sir Egbert to, "Show a modicum of good sense?" or "Don't talk off the top of your head"

or "Don't taik off the top of your head;"
when things were getting too tense?
Or "Haven't we taken care of that yet,"
as the work piles up on all sides?

THE PILE ON MR. E'S DESK—growing bigger by the hour Is an assortment of what-have-you and over it he does scour For some lost report or folder that "must be right here" says he And then spends the next five minutes pawing for it frantically. We mentioned before Don's ambition and on this point we'd like to emote Since lately we've been hearing strange noises as Latin Don does quote. It seems he has bought him a nursery and planted many a tree And then had to get a tractor and roof pruner to keep them company. Though his bousiness is small it is thriving but his total intake is slight Since he gives all his trock to the City and then grins to himself at his plight. He has beguntified Springtale Park and Parking Lot No. I And we understand from the grapevine that his task is not yet done. There is one more offer outstanding Tho the location brings tears to his eyes It's the park just noth of a bridge that no one claims as his prize.

And whenever he gets a free minute he goes up there to play.

goes up there to play.

Now wind it all up and bring an end to this ditty

(I must admit I am tired and no longer feel too witty)...

Down deep in our hearts we are sad this day since it brings an era to an end But where'er you go, whate'er you do ... you'll always be our friend And as we wish good luck to you and happiness as you go

We'll chuckle and smile when we think of you and say, Don—you've been nice to know!
