ROSEMARY A. HESSE

**Miss Hesse to Wed William Hefferan**

Rosemary Agnes Hesse and William Michael Hefferan plan a September 8 marriage. Their engagement has been announced by the bride-elect's parents, Mr. and Mrs. Hugo C. Hesse of Yorkshire road, Birmingham. Miss Hesse attended Barat College of the Sacred Heart, Lake Forest, Ill. Her fiance, a son of the William E. Hefferans of Lakewood avenue, Birmingham, is a student at Olivet college.

Speeding on U.S. streets and highways injured 702,500 men, women and children.

In 1955, 8,130 pedestrians were killed in U.S. traffic accidents.

In 1955, 2,158,000 persons were injured in motor vehicle accidents.

**DON'T BE SO---**

As parents we are prone to whisper, speak firmly or even scream. "Don't do that, Jr.; Don't you think it would be better, dear?"; Fred, turn off the TV; Go and wash your hands, Red; Don, that spinach doesn't look too good on the wallpaper; Honey, darling, tapioca makes a poor hair tonic; For Pete's sake, stop squashing those lady hugs;" and so on.

As sort of embryo yard and garden mentors we are prone to be a little didactic at times; although leaving a bit more to the suggestive rather than the negative as—

Your lawn needs nourishment in the Summer. An all organic material such as AGRINITE or REGAL LAWN FOOD is excellent. No watering required... no burning.

Your flowers need two or more applications of fertilizer after the original Spring dressing.

The blooming stalks of DELPHINIUM can be cut to about 3 inches after blooming, fertilized with 5-10-5 or 1-12-4 and may come up with a fine second blooming. A third and even a fourth bloom are possibilities.

HARDY CHRYSANTHEMUMS will make a better Fall display if fertilized now with 5-10-5 or 1-12-4. PINCH them once more right away.

BUCKWHEAT HULLS on the beds will hold the weeds down while permitting nourishment, water and air to penetrate to the roots.

The success of a ROSE BED depends largely on the amount of water used. Soak well at least once a week. Use STABLER'S XXX ROSE FOOD once a month during growing season. 3 to 4 oz. per plant. (Buy the Sunset book "HOW TO GROW ROSES" for a buck and a half.)

ORIENTAL POPPIES have usually become dormant by late July and can be divided. Cut roots in two-inch pieces and plant in good soil. Most of them will develop.

MADONNA LILIES should be divided as soon as flowering period is over—NOT in the Spring.

PEONY seed pods should be removed and some 1-12-4 cultivated in to make good strong eyes for next season.

PANSIES and VIOLAS usually produce better flowers if cut back severely at this season and fertilized and thoroughly watered.

WISTERIAS may be pruned now and will benefit, as a rule, from much harder trimming than is usually given.

**VEGETABLES...**

Plant—ugh—turnips no later than this week-end. Set out late cabbages.

Chinese cabbage may still be sown.

Side dress the vegetables with 5-10-5 or 1-12-4 by making a furrow along the rows about two inches from the plants, scatter fertilizer in furrows, cover with dirt. Do it twice during the season.

Dust beans regularly with ROTENONE.

DO NOT USE DDT on melons, squash and cucumbers. Spray stems of young squash plants with BLACK LEAF 40 to control borers.

CORN EARWORM can be controlled by dusting the silk with NEUDUST (DDT) or putting on a few drops of mineral oil.

Someone complained that SOMETHING is eating her parsnips. Isn't that nice?

Stop crabbing and crack the crabgrass with CRAB-NOT.
