PHONIA
AMMONIA

Ammonia should not be used for home rug care. The use of ammonia may permanently injure rugs and carpets or furniture coverings. Soaps containing alkalis are not recommended either.

The wool pile of your rugs and the dyes with which they have been colored are sensitive to alkaline solutions. Their use may cause bleeding of colors or other discoloration and may damage wool fibers.

The National Institute of Rug Cleaning, Inc. recommends that carpets and rugs be professionally cleaned at least once a year. COMPETENT professional care, like you receive at Crescent Carpet Cleaning Co., will remove the accumulation of sharp-edged dirt which creeps into the base of carpet tufts. This soil actually cuts fibers and shortens carpet life as much as 50%. Professional cleaning will also remove dinginess from the pile surfaces.

For truly professional rug cleaning, where special attention is paid to details. Call LI 7-2922.

The handsomest seats in the
suburbs by Sam Moore

These are the chairs that Edward's buys by the carload and sells by the floor-full. And we'll bet our bottom level they'll be the favorite county seats of Oakland Co., too. The values are obvious: you'd expect to pay \$20 to \$30 more for chairs like these. The styling is simple, eminently blendable. All five styles come covered in More fabrics, more colors than you'd hope to choose this side of a custom upholsterer.
