Graefield-Derby Parents, Prizes, Pupils A-Plenty at Pembroke Panic

It seemed as though almost everyone and their children attended the "Pembroke Panic" held at Pembroke school Friday afternoon and evening. The affair, aimed primarily to interest youngsters, drew plenty of them and their parents also.

Many of the fathers detoured from the commuter train directly to the school, and others in the neighborhood knew where to find mother and the children, even at dinner time.

In charge of the affair was Mrs. Donna Pace, PTA ways and means chairman. Each schoolroom had classrooms in charge of a project or a game. Every child seemed to win a prize. Ray McFarland, PTA president, said most of the proceeds from the event will be given to the school for training aids, planetariums, photo files and reference books for the library. The remainder will stay in the PTA treasury for next year's operational expenses.

A new age of automobiles begins with this car

Here Today! The FORD SKYLINER — world's only Hide-Away hardtop

Once in a long, long while a car comes along that people remember and talk about for years after its introduction.

The first model "A" Ford was such a car... The first Ford V-8 was such a car... The first Ford Thunderbird was such a car.

Today Ford Division is proud to announce still another car that many say is destined to become the most famous Ford of all: The Skyliner — world's only hide-away hardtop.

If you plan to buy a new Ford, or already own one, the fact that Ford created this car is important to you. For all the exhaustive research, planning and testing that went into the Skyliner is evidence of the engineering skill you get in every Ford model.

The Ford SKYLINER, the only all-steel hide-away hardtop, is a car for history. This is an old dream of Detroit, a dream of two generations of motorists.

And today Ford has made that dream come true in steel.

But the story behind this dream is a story of men who refused to accept "no" for an answer. In the Ford tradition they kept striving toward the goal long after others had given up the chase.

To understand this Ford spirit you must go back to 1908. That was the year when many Detroiters smiled smugly as Henry Ford announced, "We will build a motor car for the great multitude... so low in price that no man making a good salary will be unable to own one."

And they did.

Today, nearly a half century later, Ford continues to cause the "experts" to change their tune. When you see this all-steel hardtop that retracts into a convertible, you'll be seeing a car that many said would never be mass-produced.

But Ford did it.

It was December 1956 — after eight years of research, planning, experimenting and testing — when Ford unveiled this masterpiece... unveiled it amid all the pomp and splendor of the New York Automobile Show.

And now this history-making car, this prototype of a whole future generation of cars, is ready for your own personal inspection in the showrooms of many Ford Dealers.

Plan to see it soon. And ask your Dealer to show you the exciting advances in all models of the new Ford line for '57.

It's the newest new kind of **Ford**
