

Appropriate Jewelry Includes Cufflinks With Matching Tie Bar

Part of the know-how of dressing right is having an adequate number of cuff link-and-tie bar sets or supply of bolts for every occasion business, casual or formal. You wouldn't, for example, wear mother-of-pearl links with a sports outfit any more than you'd wear leather links with your tuxedo.

For this fall, the selection of masculine jewelry and belts is not only the most extensive in many years but the most interesting.

THE JEWELRY for example, is highlighted by cuff links and tie bars that are slightly smaller in shape and endowed with some amazingly delicate designs. In general, there are designs to please all tastes, simple modern concepts and reproductions of antiques as well as the classic models that have become traditional.

Both silver and gold are used to mount handsome stones that include onyx, agate, crystal, cat eyes and a host of others. Double-ender links are seen more often, too. These are reversible links that sometimes carry a second design on their reverse side.

IN THE SETS of links and tie bars, there are exact repeats of the links in the bars as well as reduced reproductions for the tie holders. Pin-through tie tacks are also very popular.

The leather craftsmen have gone all out in their array of leathers and designs. Fastened by new and unusual buckles as well as by the classic harness styles, the new belts

Knitted Shirts, Button-collars Good Sportswear

Look what has happened to the sports shirt. Here are found reproductions of authentic regimental stripes, magnified foulard-type patterns, neat challis-type motifs and stripes with widening and diminishing stripes on grounds of harmonizing shades.

There are also more boosters for knit shirts, always a favorite for active sportswear but now particularly for autumn golf. These knits have taken on a decorative as well as functional value and are now as handsome as they are practical. In addition to the familiar pull-over models, the knits are now made in coat styles and new sweater-type shirts.

"IVY" FANS will find enough button-down collar styles to satisfy even their appetites for such models. Many of these are in classic tartans, bold glenurquhart plaids, strong solid shades, gingham-type checks and traditional stripes.

From this rundown, it's easy to see that you can rate that "exclusive look" with a pick of new shirts.

It's in the Bag . . .

. . . this budding romance between these charming beginners, who display the latest fashions in essential carry-alls, with hers boasting an outside pocket for carrying snacks, and his sporting two-tone leather. Plenty of room in both for books, pencils, crayons and what have you.

Wool Fabrics Lead In Slacks Field

Woolen fabrics lead in the slacks field. These are followed by blends of wool with man-made fibers, hinos and polished cottons, and rayons.

Top color choices include medium tones but there is a lot more style interest in patterned slacks featuring subdued stripes.

Plannels, whipcords, gabardines

and covert clothes are supplemented by Bedford cords and cavalry twills in slack fabrics.

There is also quite a choice in slacks pockets. The standard types are supplemented by versions that vary from a slight slant to extreme ivy concepts made with the frontier style pockets usually associated with Western pants and riding breeches.
