Challenges Timing Of Hunter Lights

To the Editor:

It is recommendable for TV, Ec., to arrest the advancement of the time of hunter lights from 7 p.m. to 9 p.m. because it is not known that this is the exact time when the lights are needed. Many residents have expressed their concern that this change might lead to unnecessary traffic congestion and unwanted noise. Therefore, it is suggested that the time of hunter lights be reconsidered to ensure a more efficient and quieter night-time environment.
