DOWN TO EARTH

Feed Ground with Liquid Fertilizer

Summer is especially the right time in the area with "rolling famous." We are always aware of the fine tracts we have to view the field in all of the institutions of Crawford, and in some cases there is the rule past our door. It is good news for the next season. The General Motors Chemical Co. has been marketing this fertilizer since its introduction more than three years ago. It has 32 elements in the product, as well as other nutrients, and it will cover a wide range of crops and needs. It is a granular form of fertilizer, easy to apply in the field. The product is also easy to handle, with no dust or residue. It is available in several different forms, such as granules and liquids. Liquid fertilizers are easy to apply and can be mixed with water. The product is effective in a wide range of soils and can be used in a variety of crops. It is a water-soluble fertilizer, which means it can be used in irrigation systems. The product is also easy to apply in the field, with no dust or residue.
