## Place and Decorate Your Christmas Tree With Care

It is the night before Christmas . . . But not everyone sleeps. In fire stations there's an air of uneasy tension. Fires at Christmas time are particularly tragic at this the happiest holiday of the year. On this most sentimental day thousands of homes and apartments are carelessly and unwittingly converted into dangerous fire traps—regardless of warnings by fire department officials and safety authorities. Two years ago fires on Christmas eve killed 23 persons, most of them children, and in the four-day week-end last year took the lives of 54.

This year, for instance, the nation's fire losses may well be over a billion dollars, the death toll close to 10,800, according to the National Board of Fire Underwriters. Over 200,000 fires, the National Board declares, were in the home.

Among fire victims at Christmas time a year ago were a mother and four children in Meriden, Conn.; three brothers in Allagash Plantation, Me.; three sleeping children in Great Falls, Mont.; two small children in Phenix City, Ala.; a sleeping mother and five children in Ironwood, Mich.

You can save your life and you can prevent fires by observing the following suggestions offered at this time by the National Board:

- The Christmas tree is a potential fire hazard and caution should be taken in its selection, placement in the home, and maintenance.
- Play safe by choosing a small one. There will be \$0 million on the market.
- Keep the tree outdoors until ready to set it up. While it's outdoors, occasionally throw water over it. This will keep it moist, fresh.
- When you bring the tree inside, cut the butt slantwise to open the pores, then stand it in a tub of water or moist earth.
- Be cautious of chemicals or other substances sold for "fire-proofing" trees. In some cases this process is ineffective.
- In placing the tree, it's best to avoid "hot spots" such as those near the fireplace, stove, television set, radiator, or electric bulbs.
- Never use untreated paper ornaments or untreated cotton batting or gauze for decoration. Cotton and gauze can be made flame-resistant by dipping in a gallon of water mixed with nine ounces of borax and four ounces of boric acid.
- Use only electric lights, never candles. Be sure, too, that wires are in good condition and bear the UL mark denoting Underwriters' Laboratories, Inc., which shows they have been tested for safety. Frayed electric cords are a fire hazard.
- The switch for turning on the tree lights should be placed some distance from the tree. Never use an outlet or plug under the tree or run electric trains around the base.
- If decorations are used about the house, do not permit them around or near chairs and other places where people may smoke. It is preferable to have them near the ceiling, well above the head of anyone standing up.
- Keep plenty of ash trays handy during the holiday season, as always.
- If lights are desired in windows, never use candles. Keep curtains and other flammable material pulled back at least six inches from any electric light.
- Use non-flammable decorations of glass or metal, and "fireproof" snow in decorating your tree for Christmas.
- After you have opened your Christmas presents, remove all the gift wrappings and packing materials from your living room and dispose of them.

... for people like this happy twosome, for example, spending a pleasant vacation in the south. He's worked hard for what they have, and in many ways so has she, but they take the time to enjoy it. They have ever since his attorney advised him to let National Bank's Trust Department handle his investment portfolio.

It was sound advice. It's freed him to devote his full energies to his job and his family. And his job and

family are better off because of it. So is his account. Our Investment Agency Service has returned him considerable income over the years. He has also created a trust in his will which will provide similar investment management for his survivors, who may be less experienced in making investments.

We'll be glad to talk to you about the many advantages of a trust relationship with National Bank of Detroit.
