**Traffic Problem**

To the Editor:  
 Travelers on the new John Lodge Expressway may have noticed the posted signs (Min. Speed Limit 40 MPH). This sign is a puzzle to me as I have to drive most of the way in second gear during rush hour traffic.

What is being done to eliminate the extremely heavy traffic jams on Northwestern highway now that the John Lodge Expressway has filed? Northwestern is overflowing? Can't the scenic but impractical island between traffic lanes be used to create an additional new lane in each direction?

**PARTICULARLY BETWEEN**  
 Eight and Nine Mile Roads, as it

taken from 15 to 20 minutes to travel this span during rush hours. Having traveled Northwestern highway for over 17 years, I would like to question why (with all the multi-million dollar expansions that have taken place between Eight and Nine Mile Roads), we are still confronted with floods over the highway whenever we have heavy rains.

If we can't afford storm sewers, can't the scenic island between traffic lanes be regarded to provide drainage? Similar to the system used on the Ohio Turnpike.

 Birmingham

**Smile Awhile**

The teacher was talking about the dolphins and its habits. "And children," she said, impressively, "just think! A single dolphin will have 5,000 baby dolphins."

"Goodness!" exclaimed the little girl at the foot of the class, "and how many do the married ones have?"
