ELECTRICITY--AND YOU

You use electricity in increasing amounts to do the monotonous, the tiresome, the time-consuming household tasks. It makes life more enjoyable. But there is a problem related to this growing trend.

4 out of 5 homes, including the newest, have electrical systems incapable of supplying all the electricity needed for daily living. The solution is wiring modernization—fortunately, neither a costly nor an involved process. Benefits: a home that operates smoothly and effortlessly because electricity becomes available in efficient abundance. And a house that has greater re-sale value too.

There are electrical contractors especially well qualified to do this sort of work, the **HOUSEPOWER** Services Contractors. They tailor the mechanics of electrical distribution to your individual needs and living habits.

You seek plenty of horsepower in your car for maximum comfort, convenience and safety. For the same reasons you need plenty of **HOUSEPOWER*** in your home.

***HOUSEPOWER** is a simple, one-word way to say...
plenty of electricity in the home, wherever and whenever needed,
now and in the future

Any **HOUSEPOWER** Services Contractor will be glad to survey your home's electrical needs, with you. The service costs nothing—doesn't obligate you.

If you do not know a **HOUSEPOWER** Services Contractor, just phone your Edison office
