

Nature has ordained sufficient atmosphere to provide plenty of oxygen for the breathing of all life. The essence of all religious teaching is that God, in His great benevolence, provided sufficient love to embrace the whole human family. Man's real problem is to learn how to share in this divine philanthropy.

Shows to Benefit Projects Of Local Organizations

By FRAN MAIER

The look of fashion this spring is one of gentle, feminine elegance, and the new spring fabrics are very much in keeping with the trend.

However, midday will prefer blondes in her wardrobe—that is, blond, beige, honey, yellow, lavender and creamy-whites on rank gray or navy this year.

IT'S a wonderful spring for suits and costumes. Costumes with capes are the newest and most important. Those "little furs" also rank high in the line of capes. The smartly dressed woman will also make a dash for it in this season's hat decked with oversized flowers or she may choose one of those darlings of Paris, the new profile hat.

WITH all the new styles and Easter approaching, fashion shows are definitely "bringing out" the suburban woman.

Of course these shows serve a two-fold purpose. Not wanting get a preview of spring styles will at the same time contribute to a worthwhile project.

Many of the shows have passed, but there are still more in the offing. Birmingham Junior Woman's club members have chosen March 27th as the date for their show. Katharine Gibbs Alumnae have March 29th checked, and the Women's Auxiliary of Michigan State University alumni club are making plans for April 2.
