HI-FIDELITY SOUNDS BETTER IN A CARPETED ROOM . . .

More and more people are discovering that carpet is a "hi-fi" fan's best friend. The best and most expensive set of hi-fi equipment will sound poor if it is placed in a room that is improperly sound-conditioned. Many of the pure tones are lost to the listener as they wind up bouncing off the hard floors and echoing around the room. Too much bounce-back causes distortion. Carpeting the floor is an ideal way of checking this defect.

And an ideal way of maintaining the beauty of that carpet is the yearly professional cleaning at the Crescent Carpet Cleaning Co., to remove the accumulation of sharp-edge dirt which creeps into the base of carpet tufts. This soil actually cuts fibers and shortens carpet life as much as 50%. To find out how easy and inexpensive professional carpet cleaning is, call LI 7-2925.
