

Henry Browner's Mother Writes Article for Post

WING LAKE—Mrs. Helen Torrey, mother of Henry Browner of N. Worlington road, is the author of an article published in April 27th issue of the Saturday Evening Post.

Mrs. Torrey and her husband, Bill, have the unique experience of owning a cattle ranch on Osauga Island near Savannah, Ga. Her article describes the extensive study and experimentation involved in decreasing the deer population of the island by taking them alive instead of killing them.

"THEY CATCH Wild Deer with Their Hands" reveals methods finally found effective to catch animals so that they could be used for restocking some sixty Piedmont and mountain counties where there were no deer.

Mrs. Torrey has written for years as a hobby and has done a considerable amount of "ghost writing" but is thrilled to have had this particular piece of work published in such a wide-read magazine.
