Plants Parsley for Kitchen Use

One spring ritual is done. I always plant a packet of curly leaf parsley beneath an evergreen located near the house, then I am assured of parsley for cooking and adorning dinner plates at least nine months of the year.

It is a good idea to plant a fresh packet each year to refresh the supply. Seeds can be scattered very early in the spring, with a light covering of soil.

This practice came to me from Mrs. Frank Knight.

Curly leaf parsley is important in your garden, not just because it is pretty. If you plant it in the early spring, they have the power to sort of regenerate your outlook.

to be close to the family. Don't buy a small packet of commercial parsley from the store and use it over the lawn and in the young household's hair. Secure some seeds, make a large square or oblong, and fill it with clean sand.

THE CHILDREN can sit on the lawn. The children's possibility for being hurt by a large, sharp pin can be a good educational project.

If you have views you want to

look out in a sunny location, plant a packet of curly leaf parsley. It will be seen from children and dogs.

I suggested the first year that he plant two curly leaf seeds in a hole every six feet between the mulch trees which are planted three feet apart. Curly leaf parsley will grow fast and tall in the sun, a grand view blocker.

'Power Up' For Modern Gardening

Mrs. Burlingame

PROMISE YOURSELF that next fall you will plant 25 close to your bedroom window, the kitchen window, or picture window. Plant them only as your spring time.

Another small bulb which will be following with its show is the grape hyacinth. The Latin name means "like a bunch of grapes."

They ripen rapidly and the vivid purple color is a fall for most shrubs and some structure color.

They leave a long time to dry up and are on companion plants that many growers of ornamentals, constantly use bulbs in the same spot before following them with other eye-appealing. If you want a spectacular fall of bulbs be sure and select only one type. This is a sure all of them being in flower at one time. Plant in drifts of color and not stripes of the border.

THIS IS the time of year to back down to your garden design. You can make a pattern on shelf paper. Make squares which will represent the feet. Have that you designed for your family, and YOUR AGE.

Don't try to put the baby's and pile way off to the other end of your property. They always want

If you have a more than ordinary sized lawn and garden you have no doubt been thinking about power tools. These new time and muscle savers are fast changing garden chores into fun.

There is a power tool for every garden need. Just make certain you select the right size and type for your garden and you'll find them a great help.

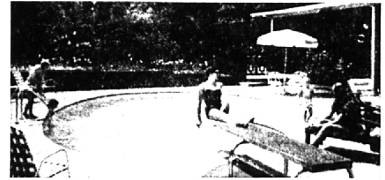

Safety, good construction, adjustability, proper size and the assurance of subsequent service and maintenance facilities are important factors to consider in selecting power tools.

LAWN MOWERS, both reel and rotary type, for latter with a leaf mulching attachment if desired, are among the favorites.

Light weight, electric-powered lawn trimmers make the trimming and cleanup job quick and easy and they reach in the hard-to-get areas which are so often neglected with hand work.

Electric clippers do hedge, evergreen, and some shrubs more quickly and neatly than they usually get done by hand.

BE SURE to check on repair and upkeep on these "big" tools for future service needs.
