### Windy's "Sleep Machine"

"Call me lazy," says Windy Taylor, "but it's folks like me who are responsible for progress."

Come see my latest invention. Windy's latest consists of an old alarm clock, some door springs, a car battery—all wired up to the hopper of his cattle feeder.

When the alarm goes off it closes a circuit—opening the chute and sending feed into the manger automatically. The clock's set at 12, so the cattle get fed midnight and noon while Windy sleeps the takes a mid-

day nap. They look fat and contented...and so does he. From where I sit, I wouldn't call Windy "lazy." Far from it. It's just that he looks at things from every possible angle—and it seems to do him good. Windy keeps an open mind on all subjects. If you prefer buttermilk to, say, a glass of beer, he's not the type to "invent" ways of forcing his choice on you.
