A prominent trend in waterway transportation is the growing demand for coal barges of 1,000 to 2,400-ton capacity, to carry coal to electric utility and steel plants located on the nation's inland rivers. Capacity of the 1,000-ton barges is equal to 20 fifty-ton railroad hopper cars and capacity of the 2,400-ton barges is equal to 48 fifty-ton hoppers.

Rapid industrialization of India has prompted plans for boosting annual coal production from the present 38,000,000 tons to 60,000,000 by the close of the country's second Five-Year Plan. Some authorities believe it will be necessary to step up India's coal output to as much as 160,000 tons a year to keep pace with its industrialization.

## Teen Panel

(Continued from Page 5-C)

your point of view towards your parents?

Quarreling needlessly is wearing on everybody. In a quarrel no one is willing to back down and admit the other person is right. But if you explain your point of view to your parents in an adult manner, by being quietly firm, they will be more likely to listen to you.

Perhaps, you have acted immaturely in the past. Are you sure you recognize the responsibility of adulthood? Making decisions and having the responsibility lie on your shoulders is not a light load. It takes understanding on both sides to realize how necessary the independence stand is and the desire to which it can be safely granted. You are asking for personal freedom which means responsibility. This requires emotional maturity on both sides of the "even keel."

Do you have a question your Teen Panel can work on?

Write it down, sign your name and address, the school you attend, and send to: TODAY'S YOUTH EDITOR, The Birmingham Eccentric, Birmingham, Mich.

The Teen Panel will deliberate the question, and the answer will appear shortly thereafter in these columns.
