Sodon Lake Holds Mystery In Its Phenomenal Depths

By SAVILLA SLOAN

BLOOMFIELD TOWNSHIP~Lying in a deep pocket nestled in high hills of turtle rock, Sodon Lake in Bloomfield Township is capped by a long slant of earth. Its surface is clear, but the sapphire lake is a scientific phenomenon.

Yesterday a phenomena was a lot of fun. Sodon lake makes one wonder why there is more to this world than meets the eye. The lake is surrounded by a large hillside and a small hillside on the other side of the lake. The lake is about 50 feet deep and has a very interesting bed of rocks and stones under water. It is said that the lake was formed by a glacier that once covered the area. The lake is about 300 feet long and 150 feet wide. The lake is fed by a small stream that flows into the lake from the west. The lake is surrounded by a large hillside and a small hillside on the other side of the lake. The lake is about 50 feet deep and has a very interesting bed of rocks and stones under water. It is said that the lake was formed by a glacier that once covered the area. The lake is about 300 feet long and 150 feet wide. The lake is fed by a small stream that flows into the lake from the west.

Other species have been known to inhabit the lake, such as a variety of fish and birds. The lake is a popular spot for recreational activities, including fishing, boating, and swimming.

Residents Jam Hearing Protest Zone Changes

WESTWOOD~About 100 people jammed into the offices at the Westwood Village Mall on Wednesday for a public hearing on changes to the village's zoning code. The hearing was held as part of a decision to zone the property.

It was the first public hearing held by the newly appointed planning commission of the village. The commission has been meeting to consider the zoning code changes for several months.

The hearing was held to gather public input on the proposed changes. The commission has received a large amount of public support for the changes, which are intended to encourage development in the area.

Residents expressed concerns about the changes, saying that they would result in a loss of green space and a decrease in the quality of life in the area. Some residents also expressed concern about the potential for increased crime and noise.

The commission members listened to the public comments and will use them to help shape the final version of the zoning code. The code is expected to be adopted in the coming months.
