Greens Are Gay For This Autumn

This year fall will be as green as spring! Green is sprouting up all over — rich, clean and luxurious in every type of fabric and style. Leaf green, too, is budding out, veining strongly with cool moss green for attention. Following the trend toward Landscape Colors for fall, greens continue, picking up the hue from every natural tone of that shade and blending together to create striking new hues of their own. Green is especially important because of its affinity for orange, blue, brown and the other fashionable colors for fall. Pick something green this season for a fresh alive look all winter through.

national FIRE PREVENTION week

DON'T BE A STATISTIC

Somebody's home catches fire in this country every 57 seconds of the day and night, resulting in more than 11,000 deaths in 1957. 3 of every 4 deaths resulted from fires occurring in the private residence, with about 100 injuries for every fatality. YOU CAN PREVENT THIS From Happening To You and Your Loved Ones by installing:

- 1) Complete U.L. approved Fire Detection Systems or Falcon Single Station Fire Detectors, U.L. Approved.
- 2) Adequate Fire Extinguishers
- 3) Properly servicing your present extinguishers

Many residences of Birmingham are now protected with our products and services. If your home is not adequately protected against fire, why not avail yourself of our services, as have many of your neighbors. For further information...
